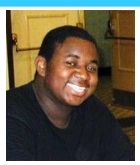
PARENTS MAKE THE DIFFERENCE!

Families Together, Inc.



EDUCATE

Since 1982, Families Together, Inc. has provided training, resources, and individual assistance to Kansas families who have children with disabilities and/or special health care needs at no cost. Our individual assistance and workshops help parents and professionals understand the complex systems of special education, healthcare, and community services.

ENCOURAGE

Through our Parent-to-Parent Program, we connect parents at the beginning of their journey with parents who have made the same journey. Parents can also utilize the program for other situations in which they feel the need for additional support. Together they share their challenges and successes in a positive way. Our conferences and training provide another great way to network with other parents and professionals. All of the Families Together staff have a loved one with an exceptionality and have first hand experience and expertise.

EMPOWER

By providing support, Families Together gives parents the training, resources and tools they need to become the best advocates for the sons and daughters. Through partnership building, parents become confident team players in their child's health and education.

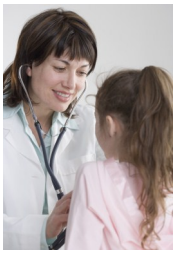
Some more about us...

Parent Training and Information (PTI) Center
Every state has a PTI funded through a grant by the Office of Special Education Programs (OSEP).* Families Together staff helps parents understand their rights and responsibilities within infant-toddler and special education services. We help parents understand their role as members of an Individual Family Service Plan (IFSP) or an Individualized Education Program (IEP) team. Parents also learn the importance of natural environments and a Free Appropriate Public Education (FAPE) in the Least Restrictive Environment (LRE).

Family-to-Family Health Information Center (F2F HIC)



Families Together, Inc. assists families and their children and youth with special health care needs (CYSHCN) and the professionals who serve them. Because the health care needs of CYSHCN are chronic and complex, parents and caregivers are often challenged with finding the resources to provide and finance health care. Staff understand the issues families face and provide advice, offer resources and tap into a network of other families and professionals for support and information. The funding for this project is provided by the U.S. Department of Health and Human Services.*
